

Tips to Help You with Your Team Presentation

Record a video of your presentation and submit it to Oregon Envirothon, heath@ofri.org.

Some useful tips to consider:

- Properly cite all references referred to in your presentation.
- Presentations are recommended to be 10 minutes in length.
- All team members should participate for scoring.
- You are not required to use computer technology (i.e. PowerPoint) for your presentation but it is acceptable. You may use flip charts, props, public forum discussion, etc.
- Make any text large enough to read from a distance away.
- Judges scoring is based on content, not the method of delivery.
- Refer to the Oral Presentation Judging Criteria Sheet for scoring
- Practice, including transitions between speakers
- Make your voice loud, clear, and expressive. Try not to speak too rapidly or have constant body movement to distract from the content you are presenting.
- Presentations should divide into a very recognizable- **Introduction, Body and Conclusion**

For example:

- 1) In the introduction, have the team leader briefly recap the problem, state each objective, and name the person presenting each objective.
- 2) In the body, clearly outline and explain said objectives.
- 3) In the conclusion, restate said objectives and demonstrate a definite finish.
